

Conserve Features

The remote switch easily cuts off or activates the power that flows to devices plugged into Conserve's Switchable outlets, while devices such as DVRs or Routers can be plugged into the Always-On outlets, since they require a continuous power supply.

Conserve Surge Protector

Always-On Outlets - Plug in devices that require continuous power here.

Wireless Router

Cordless Phone

DVR

Set-top box

Switched Outlets - Plug in devices that can be completely powered off when not in use.

Computer

Monitor

Printer

Scanner

Additional Features

- **1000 Joules and \$100,000 Connected Equipment Warranty** - and Peace of mind for you and premium protection for your valuable electronics.
- **Safety Shutters** - Protect your family by covering exposure to unused outlets
- **Cable management Clip** - Keep power cords tidy and out of the way.

Conserve Remote Switch

- **Up to 60 ft range**
- **Wall-mountable and portable** - Place your remote switch wherever you like. Saving energy is now as easy as turning off your lights.
- **RF Technology** - Wireless and powerful enough to reach through walls and objects, so that you can place Conserve behind cabinets or under furniture, as needed.
- **Channel pairing** - Use a single remote switch to control multiple Conserve units throughout the house.
