

UL 1449 3rd Edition Compliant

Meter-Treater announces the completion of it's UL 1449 3rd Edition testing on it's entire line of AC Power Surge Protection Devices. Meter-Treater was pro-active and initiated a complete product redesign in order to be in full compliance with the UL 1449 3rd Edition. Our Surge Protection Device (SPD) products have already been tested using the UL 1449 3rd Edition Safety Specifications a full 2 years prior to the mandatory compliance.

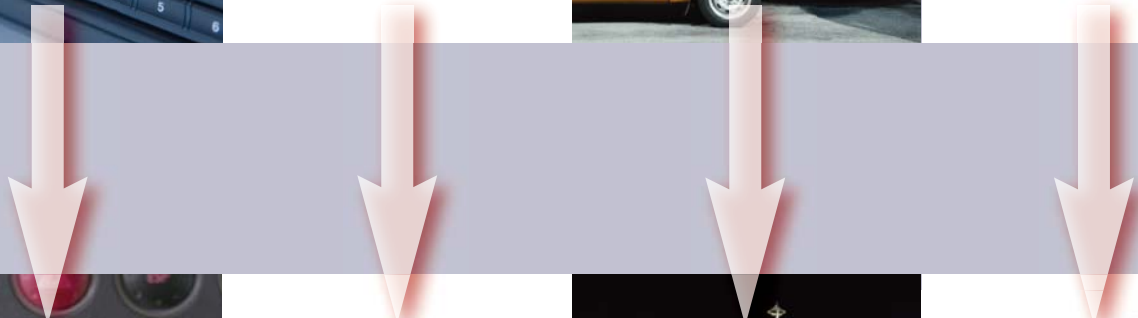

Meter-Treater's Surge Protection Devices are ETL Listed to UL 1449 3rd Edition by ETL Semko, an OSHA approved Nationally Recognized Testing Laboratory (NRTL). ETL Semko supports and enforces the same UL specification and meets all the criteria set forth by OSHA.

So, why purchase 2nd Edition products when 3rd Edition Listed products are available now?

Did you know?

If your supplier is not in compliance with 3rd Edition their product warranties could be up in as little as 2 years.

Would you buy this . . .

if you could get this for the same price?

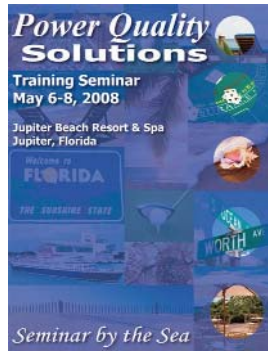

So, why would you buy products tested to the old Safety Standards when you could get UL 1449 3rd Edition tested products for the same price?
