**WEDNESDAY'S CREDIT SESSION**

**NFPA 70E Electrical Safety - 8 hour session - CEU Course**

This comprehensive electrical safety course will assist the employer in meeting the safety training requirements of NFPA 70E, OSHA 29 CFR 1910.332, and the NEC requirements for a qualified person as defined in Article 100. This course will focus on the NFPA 70E with additional information on the hazards of electrical shock, arc, and blast along with the personal protective equipment requirements for these hazards. The NFPA 70E requirements for electrical safety-related work practices, which include the "Flash Hazard Analysis" are covered in detail. This information-packed course is a must for all electrical personnel working around voltages of 50 volts or more, including maintenance, supervision, engineering, construction, inspection and safety.

**Guest Speaker: Vernon Shields, P.E. - Senior Electrical Engineer AVO Training Institute, Inc.**

Vernon has over 43 years experience in the Electrical Industry with an extensive background in engineering and management. Additionally, Vernon has experience in the areas of analysis, design and testing of electrical power systems. He is thoroughly familiar with arc-flash hazards and analysis and has experience with the use of OSHA regulations under 29 CFR 1910, as well as the National Electric Code (NEC), NFPA 70B and NFPA 70E defining safety practices in the installation and maintenance of electrical equipment.

**WEDNESDAY'S NON-CREDIT SESSION (AVAILABLE TO ALL REGISTERED ATTENDEES)**

This is a Sales & Marketing Event designed for Sales Representatives, Call Center Managers, Marketing Managers, Member Services Representatives, Program Managers, Key Account Managers and Customer Service Representatives.

**Marketing Made Easy**

This session will help the attendees plan creative Marketing Campaigns using different media (Internet, E-mail, Publications, Direct Mail, etc.). Sales Strategies for Residential, Commercial and Industrial Applications will also be discussed.

**The Win-Win Situation**

Learn how Surge Protection & Power Quality Solutions can increase your Revenue while still remaining affordable for your end-customers. Whether you are looking into starting a new program or expanding your existing one this class is for you.

**The Six W's**

Attendees will be given useful information which will better prepare them to answer questions from customers and prospects about Power Quality and Surge Protection.

**THURSDAY'S NON-CREDIT SESSION (AVAILABLE TO ALL REGISTERED ATTENDEES)**

**hands-on practical experience demo**

**Case Study I - Site Survey Tour  
Site Location: Jupiter Beach Resort**

Attendees will be able to participate in two Physical Site Surveys of the Jupiter Beach Resort. You will be able to go behind-the-scenes of an operational resort for a demonstration of how to perform a Site Survey. These guided Site Surveys will include a tour of the AC/DC Power Equipment Rooms, as well as, the Information Technology and Communication Equipment Areas. Attendees will help identify existing Power Quality issues and discuss possible resolutions.

**Power Quality Solutions & Products**

This class will provide an overview of Grounding and Bonding, Lightning Protection and Surge Protection. This class will also provide an overview of Meter-Treater's complete product line including information on what can be expected from us as the new UL 1449 3rd Edition requirements take place.

**Toolbox**

Attendees will be able to participate in a hands-on demonstration of the different testing equipment and tools used in Power Quality Site Surveys.

**Who dunit? - Virtual Site Survey Experience**

This is a practical exercise where attendees will get the opportunity to troubleshoot virtual businesses that are experiencing power quality problems. Attendees will work together in small groups to solve the power quality mystery.
