

M-Ti SLT CAT6 POE

10/100/1000 Surge Protection Device

The SLT Series CAT6 POE utilizes State-of-the-Art Avalanche Diode Technology to provide fast clamping and high energy handling capability.

Unit provides protection against Transient Voltages that exceed the nominal operating voltage of incoming data. Each line is protected against surge impulses up to 400A.

The SLT device works in series with the communication lines being protected; diverting harmful transient energies, while maintaining a tight clamp at the peak voltage. Units are designed to operate in a wide temperature range and are configured for 10/100/1000 Ethernet data or similar protocol.

- Protects CAT6 data lines with $\leq 1000\text{Mbps}$ & $\leq 250\text{MHz}$
- Solid state fail-safe design
- Low shunt capacitance to reduce signal loss
- RJ45 (female to female) Connection Method
- Performance tested to verify compliance
